28 LEVEL drawer vending machine is a system of controlled distribution and dispensing of a large quantity of products of different sizes. Thanks to its unique design and surprising capacity, it can be placed in passageways and directly at workstations with high resource consumption. The machine offers up to 1,345 locations, and a modular design of drawers allows you to adjust the number and size of compartments according to the parametres of your product range.

- Full user identification 
- wide range of drawer modules 
- Authorization based on user profile 
- up to 1248 / 1345 locations 
- Reduction of resource losses and misuse 

-  99% resource availability
-  100% identification of additions, withdrawals, loans, and returns
-  Uninterrupted access to the machine
-  3G / 4G / Wi-Fi router network integration
