temrex

The BICLASS cabinet is an office solution that combines functionality and aesthetics. Equipped with two rotating shelves, it provides a quick and convenient access to documents. A movable part built into the stationary furniture allows for a 90° rotation, giving a full access to its content when the cabinet is open. The system offers a wide selection of accessories and organisers, allowing for an orderly and ergonomic storage of various types of documents or other resources. Both standard and non-standard document formats are supported, making the cabinet a universal solution for any office.
