temrex

The DYNABOX drum vending machine is a distribution and dispensing system for a wide variety of items of different sizes such as PPE and safety accessories, tools, small parts, and even medicines. A rotating drum provides a large number of independent compartments (up to 1,080) which allows for an uninterrupted access to the necessary items.   A possibility to choose an optimal vending machine configuration and modify the width of the compartments makes the vending machine a flexible support in the operation of any company. The system offers the possibility of expansion up to 15 TEMREX vending machines (of any type).

Full protection for up to 1080 locations

Consumption reduced by up to 50%

-50%
