usable shelf width (mm)	1580 - 2960	1820 - 2880	1820 - 2880
max. shelf load capacity (kg)	100	150	150
Max. load (shelves + contents) (kg)	5280	5280	6000
worktop depth	320	320	320

* rack width can be adjusted to the individual Customer requirements

The GIROCLASS office carousel machine allows you to retrieve a significant usable space in your rooms. An aesthetic finishing of the rack allows to discreetly integrate it into the existing space, making it an integral part of it. It works well wherever excellent security and quick access to resources are important. Thanks to the possibility of creating several access windows, it is possible to have a constant access to the content on several levels in a given building. Placing the access window desktop at an optimal height allows for an easy access for wheelchair users.
